

Appendix 6: Resulting Amendments to the Sustainability Appraisal

Page and Section	Amendment to the SA Report
Appendix 3 Page 41	Additional SA assessment criteria under “Encouraging Development which sustains the local economy,” as follows: 3: Does it fully consider the needs of existing businesses operating in the area? (Note re-numbering of SA criteria following this addition)
Appendix 3 Page 44	Additional SA Assessment Criteria under “To promote energy efficiency and recycling” as follows: 45. Do the proposals pay full regard to the microclimate of the area?
Appendix 3 Page 44	Additional two SA assessment criteria as follows: <u>Nature Conservation</u> 46. Does the proposal provide opportunities for roosting, nesting and hibernation of species? 47. Are there opportunities for planting regimes to facilitate bat foraging and bird habitats? Add in new monitoring indicator for Nature Conservation as follows: New opportunities for roosting, nesting and hibernating within the site.
Appendix 4 Page 47	Add in additional proposal for appraisal: 21. Proposals should include measures to create appropriate habitat to sustain species including bats, birds and amphibians. An additional proposal for appraisal:
Appendix 4 Page 47	Add in additional proposal for appraisal: 22. Proposals should make provision for cyclists and connecting the site to nearby local and strategic cycle routes.
Appendix 4 Page 47	Add in additional proposal for appraisal: 23. Developers within the development brief area shall work in partnership with British Waterways to prepare a waterspace strategy.
Appendix 5 Page 49	Add in additional rows to the bottom of the table following the SA of the three new proposals: 1. Proposals should include measures to create appropriate habitat to sustain species including bats, birds and amphibians. The SA demonstrates that this proposal is key to nature conservation within the site. It could also have positive effects on tourism and quality of life for local residents through enhancing biodiversity. 2. Proposals should make provision for cyclists and connecting the site to nearby local and strategic cycle routes. The SA demonstrates that this is a key proposal to enhancing accessibility to the site and will assist in the regeneration of the site. 3. Developers within the development brief area shall work in partnership with British Waterways to prepare a waterspace strategy. The SA demonstrates that this is a critical proposal in enhancing the basins area, considering the needs of existing businesses and making the most of the heritage waterspace in the area.
