

AGENDA ITEM NO.10.1.

CABINET
26TH JULY 2007

RECOMMENDATION FROM THE MISCELLANEOUS FUNCTIONS
COMMITTEE
19TH JUNE 2007

AMENDMENT TO THE VEHICLE, EQUIPMENT AND SYSTEMS RENEWAL
SCHEDULE 2007/08

Currently the transportation of skips is achieved by the use of a commercial operator and by deploying the Council's own skip lorry. At the Miscellaneous Functions Committee on Tuesday 19th June 2007, a report was considered concerning the procurement of a contractor to provide and transport waste skips for the disposal of commercial and domestic waste. Two tenders were opened at the meeting and were evaluated by staff from the Cultural, Leisure and Commercial Services Division.

As a result of the tender exercise, the Council has been successful in identifying a commercial company to carry out the whole skip operation. This means that the need for the Council to operate its own skip lorry has been removed. The Committee, therefore, recommends the Cabinet to delete the skip lorry, at a value of £55,000 from the Vehicle, Equipment and Systems Renewal Schedule 2007/2008.

RECOMMENDED TO CABINET:

An amendment be made to the Vehicle, Equipment and Systems Renewal Schedule 2007/2008 to delete the skip lorry at a value of £55,000 from the Schedule.
